launched in 1993 the nec engineering and construction contract has become one of the uk s leading standard forms of contract for major construction and civil engineering projects the third edition popularly known as nec3 is a process based contract embodying project and commercial management best practice so its basic philosophy differs from the more adversarial approach of other standard construction contracts since the first edition of this book the third edition of the contract has seen the introduction of a new secondary option for use in the uk and amendments to a number of clauses in addition in september 2011 changes were introduced to cater for the amendments to the housing grants construction and regeneration act 1996 contained in the local democracy economic development and construction act 2009 which became effective for all new contracts entered into from 1 october 2011 these amendments have been incorporated into the text a practical guide to the nec3 engineering and construction contract will be useful to everyone in the construction industry working on a project under this contract it will be of interest to the complete construction supply chain including employers construction professions contractors and sub contractors as well as consultants and lawyers advising any of these parties either in the preparation of contract documentation or the day to day management or the resolution of problem situations which may arise

the importance and necessity of just such a work as this on economy in cutting has found ample proof in the disposal of the first edition in less than one month in a second edition being again exhausted and in our now being called upon to introduce a third such a work is bound to be popular its

advantages come so closely home to every cutter and we are pleased to record that the efforts of both author and publisher have been so fully appreciated from no other publishing firm has emanated so many works relating to cutting fitting and practical tailoring and so much is the time and attention of cutters devoted to these features of their profession that the matter of economy in cutting is in many cases perhaps comparatively a secondary consideration tis true that in the cutting of a garment saving a quarter of material is of small importance when compared with its good or bad fit but where from experience or the use of our tailor and cutter reliable model and special patterns the fit may be pretty well assured even a quarter of material on each coat cut would very soon bulk to a tolerably large amount at the present time when competition runs so high and prices must be cut so fine it became forcibly impressed upon us that a work might very advantageously be entirely devoted to economy in cutting we had little difficulty in selecting an author of thorough practical experience for this work mr falconer having devoted special attention to the matter of economy the completeness with which mr falconer has done his work will be found in the fact of its containing no less than thirty six plates illustrating different lays ranging from one to four garments on each lay or illustration the tables describe the plates giving the garment or garments their sizes and the quantities of material from which they can very comfortably be cut
